

AutoLift Maxima ML4030WX Ramp System

Heavy duty ramp system to suit mobile column hoists
22,000Kg lifting capacity

Features

- Supporting auxiliary system to convert your column lifts into a drive on lift, ideal for heavy duty vehicle inspection and servicing.
- Versatility of two hoists in one, when paired with mobile column lifts.
- Pair these with axle stands for extended work, this is an "all in one" solution for the ease of a drive on of a 4 post hoist but with the added flexibility and mobility of a column hoist.
- Complete with cross beam set.
- *Optional* 11,000Kg rolling jacking beam wheels free application is available.

Bonus Inclusions:

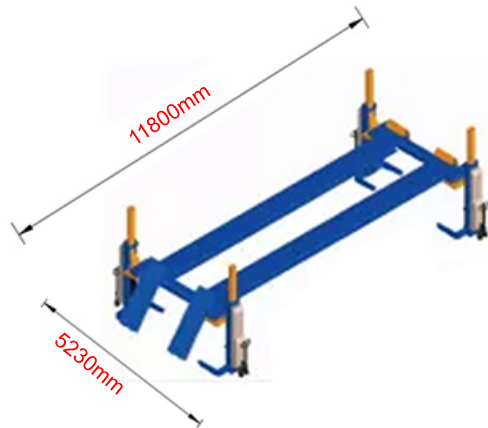

Set of 2 Cross Beams

Optional Extras:

Optional 11,000Kg rolling scissor jack

Specification

- Lifting capacity: 22,000Kg
- Platform: 2 pcs; 8500mm(L)*700mm(W)*200mm(H)
- Cross beam: 2 pcs; 3000mm(L)*500mm(W)*380mm(H)
- Loading ramp: 2 pcs; 1800mm(L)*700mm(W)*100mm(H)
- Length overall once installed with column lifts: 11800mm
- Width overall once installed with column lifts: 5230mm
